READING (10)

Q1. Read the following passage given below and answer the questions that follow:(6)

Cataract is the major cause of blindness, which is also caused by a damage to the cornea. It occurs more often in old age. As one starts growing old, the lens of the eye hardens, loses its transparency and becomes opaque. It obstructs the light rays from entering the eye.

The onset of cataract blurs the vision. Sometimes, the cataract patient sees multiple images instead of a single object image. Because of the gradual development of cataract, the afflicted person loses his/her vision and the world becomes dark to him/her.

The development of cataract is a **complex** process. However, the following factors can be attributed to its formation. Cataract generally develops in old age but sometimes, children are born with cataract because of hereditary defect. Eye injuries too, can cause cataracts.

People exposed to sun rays for longer periods develop cataract earlier than others. Researchers opine that the smoke inhaled while smoking carries substances **internally** damaging the eyes.

Ultraviolet radiation, invisible to the human eye, is linked to skin cancer. The victim loses vision and the world becomes dark to him.

Q.2 Read the passage carefully and answer the questions that follow: (4)

In India, as perhaps in many other countries of the world, trees have been held in veneration since ancient times. Our rishis of yore retired to forests to meditate and to do penance amidst trees "far from the madding crowd". Our forefathers loved trees and forests so much so that, they even deified and worshipped them as abodes of Vrikshadevata and Vanadevata. Many of them were not cut without good reason. In ancient India, groves of trees and flower gardens were reared with loving care.

In ancient Sanskrit literature, there are many references of young maidens kicking the Ashoka tree to make it flower. But in fact, the kick could be administered by anyone. The method seems to work, though nobody really knows why? Some say the kick interrupts the flow of water upwards, triggering a defence mechanism which causes the tree to flower.

In western countries people beat their walnut trees to encourage them to bear fruit. It is believed that a good beating ensures a good crop of walnuts. Like the Ashoka, the Walnut too is a tall tree. Perhaps all tall trees benefit occasionally from a beating sound.

In parts of Uttar Pradesh, they resort to another strategy to get mango trees to flower. If a tree has not given fruit in a particular year, the owner, accompanied by three or four friends, walks menacingly towards it with an axe and loudly announces his intention of cutting down the tree. His friends persuade him not to do so. When he has gone they berate the tree for not giving fruit and advise it to give plenty of fruit the next time if it wants to live. The method is said to give good results.

Answer the following questions:
